Morning,

Just bought a CB1100 2017 Standard from main dealer here in Dubai - 0km on clock.

Already removed rear fender and changed front fender to cafe style.

Want to change the exhaust to make it sound less like a hairdryer.

Aftermarket parts here in the desert are non-existent. I'm coming to UK in a few days so can anybody recommend some exhausts to do the trick which I can take back.

Slip-on best so I can carry on plane.

Thanks.

Very nice, sunshine certainly helps as does a country with at least one sensible law on the size of bike number plates

Yeah the size of UK plates is a little daft.
There no way near that size here. I'd say roughly the same size as the bike above.

how dare you :lol:

I have noticed on the continent they do tend to have good/reasonable sizes for plates, not sure why the UK hasn't followed suit or perhaps its just a case of easy money (fines) for those that choose to go smaller than legal. Mines 7x6" iirc, so smaller than legal but touch wood not taking the piss like some I've seen and haven't been fined for it ever.

Well the UK can't do thing they way they do in Europe. Europe oppresses the UK. The British are basically slaves... That's how oppresses they are. Or at least that's what I heard...

Yep, I'm working like a dog to pay all that money into our countries pockets to support anybody that wants to rip the heart of of it. :d

With a load of spineless PC twats too scared to upset anybody for anything, god forbid we should ever have an opinion of anything, like wanting to stand by traditional values and customs. :d

Deep breaths. ;)
